

100 Types of Non-functional Requirements

List curated from my experience and various sources across the internet

- 01 Accessibility
- 02 Accountability
- 03 Accuracy
- 04 Activity Logging
- 05 Adaptability
- 06 Auditability
- 07 Augmentability
- 08 Availability
- 09 Capacity
- 10 Certifiability
- 11 Compatibility
- 12 Complexity
- 13 Compliance
- 14 Concurrency
- 15 Confidentiality
- 16 Configurability
- 17 Consistency
- 18 Data Retention
- 19 Dependencies
- 20 Deployability
- 21 Design Constraints
- 22 Documentation
- 23 Durability
- 24 Ease of Use
- 25 Effectiveness
- 26 Efficiency
- 27 Elasticity
- 28 Enhanceability
- 29 Error Avoidance
- 30 Error Handling
- 31 Expandability
- 32 Expected Changes
- 33 Exploitability
- 34 Extensibility
- 35 Failure Recovery
- 36 Flexibility
- 37 Independence
- 38 Install-ability
- 39 Integratability
- 40 Integrity
- 41 Interface Constraints
- 42 Internationalization
- 43 Interoperability
- 44 Legal
- 45 Legibility
- 46 Licensing
- 47 Localization
- 48 Maintainability
- 49 Manageability
- 50 Modifiability
- 51 Modularity
- 52 Observability
- 53 Operability
- 54 Other Constraints
- 55 Performance
- 56 Physical Constraints
- 57 Portability
- 58 Precision
- 59 Protectability
- 60 Privacy
- 61 Quality
- 62 Readability
- 64 Recoverability
- 64 Redundancy
- 65 Regulatory
- 66 Responsiveness
- 67 Reliability
- 68 Reportability
- 69 Resilience
- 70 Response-time
- 71 Reusability
- 72 Robustness
- 73 Rules of Precedence
- 74 Safety
- 75 Scalability
- 76 Security
- 77 Serviceability
- 78 Simplicity
- 79 Speed
- 80 Stability
- 81 Startup/Shutdown
- 82 Stress
- 83 Supportability
- 84 Survivability
- 85 System Faults
- 86 Testability
- 87 Throughput
- 88 Traceability
- 89 Trainability
- 90 Transparency
- 91 Turnaround-time
- 92 Understandability
- 93 Undesirable Actions
- 94 Usability
- 95 U.I. Standards
- 96 User-friendliness
- 97 Utilization
- 98 Utility
- 99 Verifiability
- 100 Volume
